MAJOR/MINOR MILESTONES TO SCHEDULERS LIST

- 0.00 PE Authorization
- 1.00 Survey and Location Memorandum
- 19.00 Bridge Hydraulic Submittal
- 22.00 Preliminary ROW Limits Set
- 30.00 30% Inspection
- 36.00 M&T Submittal
- 44.00 M&T Reports Issued
- 46.06 Public Involvement / Design Hearing
- 60.00 Bridge Design Submittal
- 65.00 Plan-In-Hand Inspection
- 72.00 ROW Authorization Submittal
- 85.00 PS&E Inspection
- 90.00 Final Back Check
- 95.00 Construction Review Submittal
- 99.00 Plans to Office Engineer
- 99.05 Project Letting

GDCP MILESTONE CHECKLIST

My Screens Accounting Consult Mgt Program Mgt **Project Mgt**

Edit Tables Record Status Query **Reports** StormWater Right of Way DBE CC

DESCRIPTION

This window allows the user to produce a checklist of the GDCP milestones for a particular project or for a group of projects based upon an input target start date range. This checklist will be used to establish the projected target completion dates for the listed milestones. **THIS WINDOW IS NOT USED FOR UPDATING THE DATES!!** The checklist must be approved by the Office of Chief Engineer before updates to the dates can be accomplished on a different window.

GDCP Milestone Checklist

- Annual Plans Complete Report
- Bridge Priority Report by Div County BP BIN sequence
- Bridge Priority Report in BIN Sequence
- Bridge Priority Report in BP and BIN Sequence
- Bridge Priority Report in Statewide Ranking Sequence
- Bridge Replacement Priorities(Div,County,Pgm Yr,Bin
- Bridge Replacement Priorities(Pgm Yr and Bin Sequ
- Design Family Report
- DOT Event Site Damage Report
- FHWA End Date Report
- GDCP Milestone Checklist**
- GDCP Milestone Checklist (Work Request)
- Maintenance Resurfacing Program Fiscal Year
- Project Budget Category Detail Report
- Project Budget Category Report
- Project Budget Obligation/Modification Rpt
- Project Change Reports
- Project Listing
- Project Reports Selection
- Project Status Report
- Projects Missing Required DOT Event Information

Final Design GDCP Checklist for Project 100064176 BR 0010 (545) As of 3/29/2019

**** AUTHORIZED PROJECT ****

SR-10 Begins at 228.6 and ends at 228.686 For a Length of 0.09 In Henry County
Work Code BRG REPLACEMENT Project is targeted to start on 7/1/2018 Project
was Authorized on 6/4/2018 The Plans are to be Completed By "Not Yet Determined"
Project Description is : Replace Bridge , Bin 002543, Sr-10 Over Mcrae Mill Creek
(suff=55.2, Status=fo)

Step No.	Step Activity	Original Target	Target Completion
0	MILESTONE: Final Design PE authorization and beginning of the final survey.		Completed
1.00	MILESTONE: Location Section/Region shall transmit survey information and location memorandum to project lead.		Completed
19.00	MILESTONE: BRIDGE HYDRAULIC SUBMITTAL AND REQUEST FOR BIN	4/5/2019	Completed
22.00	MILESTONE: PRELIMINARY RIGHT-OF-WAY LIMITS SET		
30.00	MILESTONE: 30% INSPECTION (Geometric design review) The design section supervisor will be responsible for scheduling and conducting the inspection (if the inspection is required),	4/19/2019	4/19/2019
36.00	MILESTONE: MATERIALS AND TESTS SUBMITTAL FOR SOIL SURVEY, SOILS PROFILE, SLOPE STUDY INFORMATION, AND/OR MATERIALS BUILDUP	5/3/2019	5/3/2019
44.00	MILESTONE: APPROVED GEOTECHNICAL AND MATERIALS INFORMATION RECEIVED FROM THE MATERIALS AND TESTS BUREAU		
46.06	MILESTONE: PUBLIC INVOLVEMENT / DESIGN HEARING If required the designer shall bring (3) roll maps and (1) set of plans for possible use at the hearing . The design supervisor and		
60.00	MILESTONE : BRIDGE DESIGN SUBMITTAL Transmit (6) copies of the preliminary sequence of the construction and traffic control plan. Indicate whether or not	5/3/2019	5/3/2019
65.00	MILESTONE: PLAN IN HAND INSPECTION Designer shall check topographicaland survey information during the field review for accuracy and update as necessary. Review	7/5/2019	7/5/2019
72.00	MILESTONE: FINAL SUBMISSION FOR RIGHT-OF-WAY AUTHORIZATION A submittal to the Right-of-Way Engineer for acquisition of	7/20/2019	7/20/2019
85.00	MILESTONE - PS&E INSPECTION NOTE: All major design and / or right-of-way changes to high	1/3/2020	1/3/2020
90.00	MILESTONE - FINAL BACK CHECK The designer shall transmit plan sets and other items as noted below. This plan submittal shall be made no later that 16 weeks	1/31/2020	1/31/2020
95.00	MILESTONE - CONSTRUCTION REVIEW SUBMITTAL Construction Review submittal must be at least 12 weeks prior to the letting date or sooner if special circumstances exist (refer to the GDCP	2/28/2020	2/28/2020
99.00	MILESTONE - FINAL PLANS TO OFFICE ENGINEER Transmit (1) full-size plan set with required signatures, (1) disposition of Construction Bureau Review comments, (1) CD	3/27/2020	3/27/2020
99.05	MILESTONE - PROJECT LETTING	5/29/2020	5/29/2020

DURATIONS FOR GENERIC PROJECT

0.0	PE Authorization
1.0	Survey (3-6 months)
30.0	30% Review (2 months)
36.0	M&T Submittal (1 month)
44.0	M&T Reports (6-9 months)
46.06	Public Involvement/Design Hearing (7 months)
60.0	Bridge Design Submittal
60.01	TS&L (6 weeks)
65.0	Plan-In-Hand Submittal (2 months after #44)
85.0	PS&E Inspection (4 months)
90.0	FBC Inspection (1 month)
95.0	Construction Submittal (1 month)
99.0	Office Engineer Submittal (1 month)
99.05	Project Letting (2 months)
Total	Authorization to Letting – 29 months

EXPEDITING ACTIONS

- Prioritization of efforts and management of resources and schedules
 - Identify urgent vs. important
 - Assess value (make sure the boss's pet project is handled)
 - Order tasks by estimated effort
- Process efficiency
 - Kick-off meeting
 - Instill teamwork
 - Break into definable stages
 - Continuous project development appraisal
- Parallel processing
 - Network diagrams
 - Critical Path Method
 - Gantt Chart
 - Work Breakdown Structure
- Risk/schedule trade-offs
 - Scope
 - Duration
 - Risk
 - Cost

And of Course There Is Always The Problem Of Failing To Manage The Process

DEVELOPING A WORK BREAKDOWN STRUCTURE

- Fundamental to project planning (easier to track activities than whole project)
- Divide project into subordinate tasks and subtasks
- Delays can be analyzed and corrective action taken (before it's too late!)
- Basis for:
 - Project Budget
 - Negotiation
 - Monitoring Project Design Progress
 - Paying Design Consultant

Considerations

- Always use scope elements, not accounting activities
- Include project management as a discrete element
- Base WBS on deliverables

GDCP SWIM LANE FLOWCHART

DESIGN PROJECT MANAGEMENT

2.0 Organization of Project Data

- 2.01 Designer shall organize survey information in accordance with ALDOT CAD standards
- 2.02 Review Location Memorandum, ALDOT commitments, and environmental document
- 2.03 Design lead contact Region ROW to begin blanket ROE process and notify Railroad
- 3.01 Request initial estimated buildup from Region/Area Materials Engineer
- 3.02 For Welcome Center projects, request Utilities Engineer investigate utilities availability
- 4.01 Designer shall retrieve accident data, transmit to Region Traffic Engineer for comment
- 4.02 Retrieve FEMA Flood Insurance Rate Map (FIRM) for the project

5.0 Project Coordination

- 5.01 Determine if project is VE candidate (allow 8 weeks)
- 5.02 Determine if a Public Involvement meeting is required
- 5.03 Determine if a Design Hearing is required
- 5.04 Contact local floodplain administrator to determine watershed compatibility
- 5.05 Coordinate with Bureau and Region stormwater to determine water quality requirements
- 5.06 Coordinate with Bridge Bureau to determine required bridge structure work

6.0 CPMS Coordination

- 6.01 Design Section supervisor set up all relevant projects in CPMS
- 6.02 Design Section supervisor ensure adequate PE funding
- 7.0 Design Section supervisor obtain approval of off-site detour if required
- 8.0 Design Section supervisor and lead designer shall visit project site
- 9.0 Review CPMS for scheduled letting and ROW dates, and establish project schedule

DESIGN PROJECT MANAGEMENT (cont.)

10.0 Initial Project Development

- 10.02 Request a construction project number from Office Engineer Bureau
- 11.0 Request traffic data from Transportation Planning
- 12.0 Design Section supervisor shall coordinate on-site project scope meeting
 - 12.01 Design Engineer superior shall approve project scope
 - 12.02 Design Section supervisor should understand the project
 - 12.03 Submit project scope to State Design Engineer, Region Engineer, and FHWA for approval
- 13.0 Design section supervisor and lead designer shall conduct initial hydraulic investigation
 - 13.01 Designer create project hydraulics notebook
- 14.0 Develop design criteria
 - 14.01 Design section supervisor submit design criteria to design engineer superior for approval
 - 14.02 Design Engineer superior, and State Design Engineer or Region Engineer shall approve criteria
 - 14.03 Appropriate parties shall approve design criteria
 - 14.04 Design Engineer superior and Design Section supervisor resolve criteria comments
 - 14.05 Submit final design criteria for final approval signatures
 - 14.06 Get State Design Engineer and Chief Engineer approval for design criteria

15.0 Project Development

- 15.04 Coordinate with Stormwater Engineer to acquire latest data for water resources
- 15.05 Coordinate with Stormwater Engineer to determine stormwater effect on hydraulics design

16.0 Initial Railroad Coordination

- 16.01 Coordinate with Modal Programs to determine number of tracks to be spanned
- 16.03 Modal Programs shall notify project lead of railroad requirements

DESIGN PROJECT MANAGEMENT (cont.)

- 17.0 Materials and Geotechnical Requests
 - 17.01 Request preliminary shrink/swell factors from Region Materials Engineer
 - 17.02 Request preliminary materials buildup for existing pavement
- 18.0 Continued Project Development**
 - 18.05 If FHWA Order No. 5520.1, Preliminary Plan Review is applicable, notify Engineering superior
- 19.0 Request bridge hydraulic study
 - 19.01 Coordinate with Bridge Bureau for preliminary bridge information
 - 19.02 Bridge Hydraulic Engineer may request designer attend site visit
 - 19.03 Obtain BINs
- 20.0 Post Bridge Hydraulic Submittal Project Development**
 - 23.0 Designer submit CAD files to Environmental Technical Section
 - 24.0 Designer submit CAD files to Region Utilities Section
- 25.0 Pre-30% Project Development**
 - 26.0 Determine if design exception is required
 - 27.0 Calculate preliminary construction estimate
 - 28.0 Design Section supervisor and design engineer superior determine if 30% inspection is required
 - 28.01 Design section supervisor shall review 30% plans prior to submittal
 - 28.02 Design engineer superior shall approve 30% plans prior to submittal
 - 29.0 Design Section supervisor shall schedule and conduct 30% review
 - 30.0 Design Section supervisor shall write and transmit comments to design engineer superior

DESIGN PROJECT MANAGEMENT (cont.)

31.0 Post 30% Project Coordination

- 31.02 Design Section supervisor provide 30% comments to participants
- 31.03 Designer send plans to M&T Hazmat Coordinator
- 31.04 Designer send plans to Region for Hazmat investigation ROE
- 31.05 Region should obtain ROE for Hazmat investigation
- 33.0 Design Section supervisor shall determine if design exception should be requested
- 35.0 Make ETS submittal for document
- 36.0 Make M&T submittal for soil info, slope study, and materials buildup
- 37.0 Request a traffic signal review from Traffic Design Section
- 39.0 Post 30% Railroad Involvement
- 39.01 Project lead shall include applicable railroad notes on the Project Note sheet
- 39.02 Coordinate with Modal Programs for survey/drilling work ROE
- 39.03 Coordinate non-bridge projects affecting railroad ROW with Modal Programs
- 40.0 Submit plans to ETS for initiation of Section 404 permit
- 41.0 Coordinate with ETS if FERC permit is required

45.0 Post Materials and Geotech Plan Development

- 46.0 Public Involvement/Design Hearing Process
- 46.01 Coordinate PI/DH necessity with ETS
- 46.02 Designer shall complete preliminary Public Involvement/Design Hearing Map
- 46.03 Region and FHWA review and comment on map
- 46.04 Complete PI/DH Map
- 46.05 Region schedules and conducts PI/DH meeting

DESIGN PROJECT MANAGEMENT (cont.)

- 46.06 Design supervisor and designer answer design questions at the meeting
- 46.07 Project lead coordinates with ETS to address comments and design change considerations
- 46.09 Design Section supervisor shall address PI/DH comments and make approved design changes
- 47.0 Submit plans to Chief Engineer and FHWA for Design Approval
- 49.0 Transmit plans to Region for municipal agreements if required
- 50.0 Determine preliminary construction cost estimate in accordance with approved design
- 51.0 Transmit CAD files to ROW Bureau for preparation of preliminary ROW map
- 52.0 Design section supervisor contact Region Utilities Engineer on utility status
- 53.0 Traffic Design Coordination**
 - 53.01 Coordinate with Traffic Design Engineer if lighting, signals, or ITS items are involved
 - 53.02 Designer submit plans to M&T for signal pole foundation design
 - 53.03 Designer submit plans to M&T for lighting pole foundation design
 - 54.0 Designer submit plans to M&T for overhead sign pole foundation design
 - 56.0 Coordinate with Region to determine if ROW or easements required for drainage outfalls
 - 57.0 Notify ETS if tail ditching or channel changes are required
 - 58.0 Designer shall develop a preliminary sequence of construction and traffic control plan
 - 59.0 Notify Bridge Bureau if non-standard drainage structures are involved
 - 60.0 Request updated bridge structure details six weeks after bridge design submittal
 - 60.01 Project lead request roadway and bridge culvert foundation investigation
- 61.0 Pre Plan-In-Hand Plan Development**

DESIGN PROJECT MANAGEMENT (cont.)

62.0 Pre Plan-in-Hand Project Coordination

- 62.01 Submit Geometric Layout to Location Section for stakeout prior to PIH
- 62.02 Submit plans to Region and ROW Bureau Utilities Engineer for review
- 62.03 Utilities Engineer formally advise design section supervisor on utility status
- 62.03 Submit updated plans to Traffic Design Engineer
- 62.04 Coordinate with Stormwater Section to determine latest requirements
- 62.05 After coordinating with Region, submit plans and request centerline stakeout for PIH
- 63.0 Design Section supervisor shall review PIH plan assembly
- 63.01 Design Engineer superior shall approve PIH plan assembly prior to submittal

66.0 Plan Development

- 66.05 Project lead shall coordinate with M&T about special soil study requirements

67.0 Post Plan-In-Hand Project Coordination

- 67.01 If materials addendum is necessary, request from Region Materials Engineer
- 67.02 Transmit updated plan sheets to Traffic Design Engineer, request their revisions
- 67.03 Traffic Design Section submit required traffic elements to Region for PS&E stakeout
- 67.04 Submit plans for city/county lighting maintenance agreements
- 67.05 Submit revised plans for Bridge Bureau review
- 67.07 Submit plans to M&T Hazmat Coordinator for hazardous material investigation
- 67.08 Get updated traffic information from Modal Programs Bureau

DESIGN PROJECT MANAGEMENT (cont.)

68.0 Utility Process

- 68.01 Submit plans to Utility Engineer for utility company coordination
- 68.03 Utilities Engineer shall coordinate special requirements or ROW with project lead
- 68.04 Coordinate with utility requirements to sequence utility construction
- 69.0 Project lead to review environmental commitments to make sure they are addressed
- 69.01 If utility work is in project, request quantities from Utilities Engineer
- 70.0 ITS Designer to coordinate with Project Lead for scheduling ITS Stakeholders Meeting
- 71.0 Request ETS approval for Right-of-Way
- 71.01 ETS provide concurrence to design lead

72.0 Submit plans to ROW for property acquisition

- 73.0 Submit plans to ETS for FERC permit
- 74.0 Submit plans to ETS for TVA 26A committee review
- 75.0 Submit plans to Modal Programs for railroad agreement
- 75.02 Consult Modal Programs for necessary project notes to be included
- 75.03 Project lead submit plans to Modal Programs for railroad agreement
- 76.0 Designer request Bridge Bureau submittal

77.0 Continued Plan Development

- 78.0 Check with ROW Engineer for all known property owner commitments
- 78.01 Follow up with ROW Engineer for ROW and easement adjustments
- 79.0 Notify ETS if any environmental conflicts exist
- 79.01 Coordinate with ETS to determine any commitments or notes not in plans

DESIGN PROJECT MANAGEMENT (cont.)

- 80.0 Finalize design exception letter and request approval
- 81.0 Create detailed construction estimate using Project Estimating System (PES)
- 81.01 Update construction estimate in CPMS
- 82.0 Design Section supervisor notify design engineer superior if VE study is required
- 82.01 Design Section supervisor shall review the Value Engineering plan assembly
- 82.02 Design Engineer Superior shall approve VE plan assembly prior to submittal
- 82.03 Design Section supervisor request approval to contact VE Coordinator for VE Study
- 82.07 Designer shall make approved VE revisions
- 83.0 Incorporate all sheets into the plan assembly
- 83.01 Design Section supervisor shall review PS&E plan assembly
- 83.02 Design Engineer superior shall approve PS&E plan assembly prior to submittal
- 85.01 Designer to begin changes resulting from PS&E inspection
- 85.04 Coordinate with Region M&T Engineer for materials addendum
- 86.0 Post PS&E Inspection Coordination
- 86.01 Project lead submit plans to relevant parties for attention
- 86.02 After all PS&E comments have been disposed, project lead shall submit 90% ROW plans
- 86.03 Transmit plans to Utilities Engineer with detailed description of changes since 62.02
- 86.04 Utilities Engineer coordinate with project lead if additional information is needed
- 86.05 Project lead notify QC Bureau whenever a new unique number is required
- 86.06 Project lead request traffic design CAD files
- 86.07 Project lead request updated traffic information for title sheet
- 86.08 Project lead request final utility quantities and files

DESIGN PROJECT MANAGEMENT (cont.)

- 86.09 Receive updated traffic information for title sheet
- 86.10 Traffic design submit CAD files
- 86.11 Utility Engineer submit CAD files
- 86.12 Designer begin GFO 3-61 (Work Zone Safety and Mobility) if required
- 86.13 Notify region to obtain and submit City and/or County Resolutions
- 86.16 Designer shall submit partial plans to M&T Hazmat Coordinator, if required
- 86.17 Designer submit to Location Section for airport clearance review
- 86.19 Location Section notify project lead of airport clearance status
- 86.20 Coordinate with ETS to determine if additional info or permit is needed
- 86.21 Assure Materials Addendums are approved and distributed

87.0 Post PS&E Project Tasks

- 87.01 Update cost estimate for Final Back Check submittal
- 87.03 Incorporate all sheets into plan assembly (except final bridge plans)
- 88.0 Design Section supervisor shall review FBC plan assembly
- 89.0 Design Engineer superior shall approve FBC plan assembly prior to submittal

91.0 Post FBC Coordination

- 91.02 Designer request copy of Railroad Agreement
- 91.04 Submit partial plan to Location Section for review of control points and other survey
- 91.05 Designer submit plans to other parties that need to make revisions
- 91.07 Submit partial plan to ETS for Environmental Limits review

DESIGN PROJECT MANAGEMENT (cont.)

91.08 Project lead to request bridge plans ready for Construction Review

91.09 Designer enter NPDES data in CPMS

91.11 Coordinate required CBMPP changes with Stormwater section

93.0 Post FBC Plan Tasks

93.01 Designer shall start revisions resulting from FBC comments

93.02 Incorporate all sheets into the plan assembly

93.03 Update construction estimate using PES

93.04 Designer to check plans using checklist

93.05 Design Section supervisor shall review Construction Review plan assembly

93.06 Design Engineer superior shall approve Construction Review plan assembly prior to submittal

94.0 Post FBC Approvals

94.01 ETS coordinate with project lead to resolve any issues preventing approval

94.02 Receive complete bridge plans

94.03 Submit CBMPP to Region for signatures

94.04 Region return CBMPP with signatures

95.02 Designer submit plans to other parties that need to make revisions

95.04 Project lead request full size bridge, lighting, signal and utility sheets

DESIGN PROJECT MANAGEMENT (cont.)

96.0 Post CN Bureau Submittal Coordination

- 96.05 Update cost estimate using PES
- 96.06 Design Section supervisor shall review Office Engineer plan assembly
- 96.07 Design Engineer superior shall approve Office Engineer plan assembly prior to submittal
- 97.0 Design Section supervisor and lead designer shall sign each plan sheet
- 98.0 Design Engineer superior shall sign each plan sheet
- 99.03 Project lead will make required corrections to final plans
- 100.0 After award, designer shall archive the project

ETS in GDCP

- 2.02 Review environmental document if complete
- 12.02 ROW limits provided by Location Section are equivalent to environmentally cleared limits
- 23.0 Submit CAD files to ETS
- 29.0 Submit 30% plans to ETS
- 31.03 Send plans to ETS for identification of hazmat sites not previously identified
- 35.0 Send plans to Design Bureau ETS and Region ETS to start NEPA process
- 41.0 If project involves backwater impoundments check with ETS regarding FERC permit
- 46.01 Transmit partial plans to ETS for determination of public involvement meeting requirement
- 46.02 Designer shall complete public involvement meeting map
- 46.03 Transmit public involvement meeting map to Region/Area ETS and FHWA for review comments
- 46.04 Complete PI meeting map
- 46.05 Transmit PI meeting maps to Region for their use in conducting the meeting
- 46.06 Design supervisor and designer shall bring PI maps and attend PI meeting
- 46.07 Design Bureau ETS coord. with project lead to address design changes resulting from PI meeting
- 46.08 If required, Region ETS submit environmental document preparation items to Design ETS
- 46.09 Design Section Supervisor shall make approved design changes where necessary
- 57.0 If "tail ditching" or channel changes are required, transmit plans to ETS
- 60.03 Bridge Bureau will coordinate with ETS regarding documents for Coast Guard permit
- 61.14 Submit partial plans to ETS any time revisions are made to environmental cleared limits

ETS in GDCP (cont.)

- 64.0 Submit PIH plans to ETS
- 68.01 A letter from ETS is required before any utilities may be relocated
- 69.0 Project lead ensure environmental commitments are addressed/included in plans
- 71.0 Request ETS approval for ROW authorization
- 71.01 ETS provide concurrence to design lead
- 72.0 Submit ETS concurrence to ROW Engineer
- 72.01 ROW Bureau make submittal to ETS for review and concurrence
- 73.0 If Alabama Power impoundment, submit plans to ETS for FERC permit
- 74.0 If TVA watershed, notify ETS for determination of 26A committee review with TVA
- 79.0 Notify ETS if any environmental conflicts exist
- 79.01 Coordinate with ETS to determine any known commitments or plan notes required
- 84.0 Submit PS&E plans to ETS
- 86.02 If there are ROW changes outside environ. limits, a new approval letter from ETS is required
- 86.20 Coordinate with ETS for any additional information or permits not yet acquired.
- 91.07 Submit partial plans to ETS for environmental limit and commitments confirmation
- 94.01 ETS should provide approval of environmental limits and commitments

M&T in GDCP

- 3.01 Initial submittal to Region/Area Materials Engineer for estimated buildup
- 6.02 Project lead consult with M&T (and others) to determine balance of PE funding required
- 11.01 Transportation to submit traffic data to M&T (and others)
- 12.0 Design Section Supervisor to consult with M&T (and others) to develop project scope
- 17.0 Materials and Geotechnical Requests
 - 17.01 Request preliminary shrink/swell factors from Region/Area Materials Engineer
 - 17.02 Submit plans/traffic data and request materials buildup from Region/Area Materials Engineer
- 29.0 Submit 30% plans to M&T Bureau
- 31.03 Designer submit plans to M&T Hazmat Coordinator for hazmat sites not previously identified
- 31.04 Designer submit plans to Region for ROE for hazmat and geotechnical investigations
- 31.05 The Region should begin obtaining ROE for hazmat and geotechnical investigations
- 36.0 Transmit plans to Region/Area M&T for soil survey, soils profile, slope study, and buildup
- 43.0 Region/Area M&T submit materials report to M&T Bureau for approval
- 44.0 M&T Bureau distribute approved report
- 45.02 Complete earthwork calculations
- 45.03 Incorporate soil profile and borings into plan assembly

M&T in GDCP (cont.)

- 53.01 Traffic Engineer will coordinate boring locations with M&T
- 53.02 Designer submit plans to M&T for signal/ITS required boring and graphs
- 53.03 Designer submit plans to M&T for lighting required boring and graphs
- 54.0 Designer submit plans to M&T for overhead and cantilever sign required boring and graphs
- 60.01 Bridge Bureau submit TS&L drawing to M&T Engineer for foundation investigation and report
(Project lead requests foundation investigation and report for roadway and bridge culverts)
- 64.0 Submit PIH plans to M&T Bureau
- 66.03 M&T Bureau transmit approved materials addendum to Project Lead (and others)
- 66.04 Project Lead make plan revisions in accordance with approved materials addendum
- 66.05 M&T Bureau submit special soil studies to project lead and to Traffic Design Section
- 67.01 Submit PIH plans to Region M&T for materials report addendum
- 67.07 Submit plans to M&T hazmat coordinator
- 84.0 Submit PS&E plans to M&T Bureau
- 85.04 Submit revised PS&E plans to Region M&T for materials report addendum
- 86.16 Designer submit plans to M&T Hazmat Coordinator for hazmat review
- 86.21 Be sure Material Report Addendums have been approved and furnished to appropriate parties

UTILITIES in GDCP

- 2.02 Review Location Memorandum for major utility problems that may influence design
- 3.02 Request Utilities Engineer investigate availability of utilities for Rest Area projects
- 6.01 Design Supervisor verify Utility project in CPMS
- 18.04 Generate design view utility sheets
- 24.0 Submit partial plan set to Utility Engineer for conflict identification and remediation
- 30.0 At 30% review give consideration to utility conflict avoidance
- 31.05 Region should actively identify utility conflicts
- 37.0 Project lead submit CAD files to Traffic Design Section for traffic signal review
- 61.08 Consider utility conflicts in preliminary TCP development
- 62.03 Utilities Engineer shall notify design supervisor in there are any design conflicts
- 68.01 After PIH disposition, submit plans to Utilities Engineer (ETS letter req'd before utility relocation)
- 68.02 Utilities Engineer submit plans to Region/Area Utilities Engineer for coordination with owners
- 68.03 Utilities Engineer ascertain if special utility or ROW requirements.
- 68.04 Coord with Utilities Engineer and Region Utilities Engineer to determine construction sequence
- 69.01 Request quantities if utility work to be included in construction project
- 84.0 Submit PS&E plans to Utilities Section

UTILITIES in GDCP (cont.)

- 86.01 If PS&E revisions affected utilities, make revised submittal to Utilities Section
- 86.03 Transmit CAD files to Utilities Engineer after PS&E revisions are made
- 86.04 Utilities Engineer to determine if revised submittal to owners is required
- 86.08 Project lead request final utility quantities (request 21 weeks PTL, received 19 weeks PTL)
- 86.11 Utilities Engineer submit final utility quantities (19 weeks PTL)
- 95.0 Utility Certificates to be submitted with Construction Review Submittal
- 95.04 Project lead request signed full size utility plans (received 9.5 weeks PTL)
- 96.03 Utilities Engineer send Utility Certification to Construction Bureau and Office Engineer

ROW in GDCP

- 2.03 Design lead contacts Region ROW for blanket ROE
- 6.01 Design supervisor verify ROW project in CPMS
- 9.0 Check ROW authorization date routinely
- 15.05 Begin preliminary drainage design to insure adequate ROW
- 20.08 Design lead begin setting ROW limits using 4:1 slopes
- 20.09 Show ROW limits on cross-sections and in appropriate files
- 20.10 Check cross-sections to insure no design elements are encroaching
- 20.11 Recalculate earthwork when necessary and revise ROW
- 21.0 Determine clear zone and revise ROW if necessary
- 22.0 Preliminary ROW limits set
- 23.0 Submit ROW CAD file to ETS
- 29.0 Submit 30% plans to ROW Bureau
- 31.01 ROW Engineer assign ROW map preparation responsibilities
- 51.0 Transmit CAD files to ROW for ROW map preparation
- 55.0 Continue drainage design to anticipate additional ROW
- 56.0 Coordinate with Region to determine if ROW or easements are required
- 61.13 Designer firm up easements and ROW limits
- 64.0 Submit PIH plans to ROW Bureau
- 64.01 ROW Bureau coordinate ROW map and request individual tract cost estimates

ROW in GDCP (cont.)

- 66.02 ROW changes after PIH disposition require State Design Engineer or Region Engineer approval
- 71.0 Request ETS approval for ROW acquisition
 - 71.01 ETS concurrence
- 72.0 Submit to ROW Engineer for ROW authorization
 - 72.01 ROW submit to ETS for concurrence
- 78.0 Check with ROW Engineer for any known commitments to owners
 - 78.01 Coordinate with ROW Engineer concerning any adjustments to ROW
- 84.0 Submit PS&E plans to ROW Bureau
- 86.02 After PS&E disposition, submit 90% plans to ROW Engineer

TRAFFIC in GDCP

- 4.01 Send project limit accident data to Region Traffic Engineer
- 11.0 Request traffic info from Transportation Planning
- 11.01 Transportation Planning submit traffic data to project lead, Traffic Design, M&T, & Region
- 12.03 Send copy of project scope to Traffic Design Section
- 37.0 When necessary, request Traffic Design Section traffic signal review
- 37.01 Traffic Design Section will determine how to proceed
- 37.02 Traffic signal designer shall prepare warrant analysis for existing and potential installations
- 38.0 Transportation Planning transmit 12 hour traffic counts/movements to Traffic Design Section
- 45.01 Traffic updates may require materials addendums
- 53.0 Traffic Design Coordination**
- 53.01 Coordinate with Traffic Design Engineer for lighting, signals or ITS items required
- 62.03 If project design has changed since GDCP 53 submittals, resubmit affected sheets
- 66.05 M&T shall complete all special soil studies and submit to Traffic Design Section
- 67.02 Request Traffic Design Engineer make required Plan-In-Hand revisions
- 67.03 Traffic Design Section submit corrected plan sheets
- 67.04 Copy the Traffic Design Section on any maintenance agreement submittals
- 86.06 Project lead request Traffic Design CAD files, quantities, and unique numbers
- 86.10 Traffic Design shall submit CAD files, quantities, and unique numbers
- 91.01 Region provide maintenance agreement copies to Traffic Design Section

BRIDGE in GDCP

- 5.06 Coordinate with Bridge Bureau to determine if bridge structures will be involved
- 6.02 Project lead consult with Bridge Bureau to determine PE funding needs
- 16.01 Designer coordinate with Modal Programs and transmit bridge rail plan sheets
- 16.03 Modal Programs shall notify project lead of number of tracks spanned
- 18.01 Develop vertical alignment to provide bridge clearance per Bridge Bureau Design Manual
- 19.0 Request bridge hydraulic study for existing and required bridge structures
- 19.01 Designer coordinate with Bridge Bureau to determine preliminary bridge length and details
- 19.02 Bridge Hydraulic Engineer may require design supervisor and lead designer to visit site
- 19.03 Request BINs for proposed bridge structures
- 29.0 Submit 30% plans to bridge engineer
- 31.02 Design supervisor shall address necessity of staged bridge construction
- 33.0 Nonstandard bridge width is a controlling criteria requiring a design exception
- 36.0 Bridge culvert/structure stationing is required for initial M&T submittal
- 39.03 Bridge barrier rail projects require Modal Programs submittal if over railroad
- 55.0 Show bridge hydraulic data on required sheets
- 58.0 Coordinate construction sequence and TCP with the Bridge Bureau
- 59.0 Notify Bridge Bureau if culverts will have non-standard conditions

BRIDGE in GDCP (cont.)

- 60.0 Submit 30% plans and TCP to Bridge Engineer for bridge design
- 60.01 Bridge Bureau shall submit TS&L drawings for M&T to perform foundation investigation
- 60.02 Bridge Bureau shall submit information to Modal Programs for Railroad Coordination
- 60.03 Bridge Bureau is responsible for Coast Guard permit when required
- 60.04 Bridge Bureau shall furnish completed preliminary bridge layout for FHWA submittal
- 64.0 Submit PIH plans to Bridge Bureau (if bridge work involved)
- 67.05 Designer submit plans to Bridge Bureau after PIH disposition
- 67.06 Bridge Bureau coordinate with Modal Programs to determine additional railroad coordination
- 67.07 If paint removal or bridge demolition involved, submit plans to M&T Hazmat Coordinator
- 76.0 Designer request bridge drawings and estimate
- 84.0 Submit PS&E plans to Bridge Bureau (if bridge work involved)
- 86.04 Project lead request bridge plans and pay items for Final Back Check review
- 86.05 Bridge Bureau coordinate with appropriate individuals for any new unique number required
- 87.03 Complete bridge plans not required to be in FBC plan assembly
- 90.0 Submit FBC plans to Bridge Bureau (if bridge work involved)
- 91.08 Project lead request bridge plans for Construction Review 13 ½ weeks prior to letting
- 94.02 Bridge Bureau submit plans for Construction Review 13 weeks prior to letting
- 95.04 Project lead request full size, signed bridge plans 9 ½ weeks prior to letting
- 96.01 Bridge Bureau submit full size plans to the project lead 9 weeks prior to letting

RAILROAD in GDCP

- 2.03 Give preliminary notification to the railroad
- 16.0 Initial Railroad Coordination
 - 16.01 Designer shall coordinate with Modal Programs on work within railroad ROW
 - 16.02 Modal Programs shall coordinate with railroad to determine number of tracks spanned
 - 16.03 Modal Programs shall notify project lead of railroad requirements
- 29.0 Provide 30% plans to railroad
- 39.0 Post 30% Railroad Involvement
 - 39.01 Project lead shall reference attachment 9 and include railroad note on Project Notes Sheets
 - 39.02 Send request for ROE to Modal Programs for coordination with railroad
 - 39.03 Project lead to submit info to Modal Programs for securing non-bridge railroad agreement
- 60.02 Bridge Bureau to submit info to Modal Programs for bridge involved railroad agreement
- 64.0 Submit PIH bridge involved project plans to Modal Programs
- 67.06 Bridge Bureau shall coord. with Modal Programs to determine additional railroad information
- 75.0 Project lead shall submit railroad/roadway/bridge ROW plans to Modal Programs
 - 75.01 Modal Programs shall submit ROW plans to ROW Bureau for Norfolk Southern Railway project
 - 75.02 Consult Modal programs for additional railroad project notes to be included in plans
 - 75.03 Project lead shall submit summary and partial plans to Modal Programs for railroad agreement
- 84.0 Submit PS&E bridge involved project plans to Modal Programs
- 91.02 Designer request Railroad Agreement from Modal Programs prior to Construction Review
- 91.03 Modal Programs transmit Railroad Agreement to project lead and Office Engineer
- 95.0 Project lead submit Railroad Agreement with plans for Construction Review

THANK YOU FOR COMING
